**SMART CAMPUS EVENT MANAGEMENT AND
REGISTRATION SYSTEM USING SPRING BOOT**

SDG: 4 – Quality Education

Presented By:

G RAAJIDHA – VTU26488 – 23UECS0719

Courses Handling Faculty:

Dr. S . HEMAMALINI – M.E., Ph.D

INTRODUCTION

1

- The Smart Campus Event Management System is a web-based application designed to manage college events efficiently.

2

- In many institutions, event management is handled manually, leading to errors and delays.

3

- This project aims to digitalize the process of event creation, registration, and management.

4

- Students can view upcoming events and register online.

5

- Administrators can manage event details and track registrations.

6

- The system improves accuracy, reduces paperwork, and saves time.

7

- It provides a user-friendly interface for both students and admins.

8

9

- Overall, it enhances campus event coordination and participation.

PROBLEM STATEMENT

1

2

3

4

5

6

7

8

9

- In many colleges, event management is not fully automated and depends on manual processes.
- This leads to inefficiency, data loss, and difficulty in tracking registrations.
- Students face issues in knowing event details and registering on time.
- Administrators struggle to manage large volumes of data manually.
- There is no centralized system to monitor event participation.
- This results in poor coordination and reduced efficiency.
- Hence, a need arises for a reliable and automated system.
- The system should simplify event management and improve accuracy.

OBJECTIVE(S)

1

2

3

- To design and develop a web-based system for managing campus events and registrations.
- To implement an efficient platform for event creation, registration, and tracking.

4

5

6

7

8

PROPOSED SYSTEM

1

2

3

4

5

6

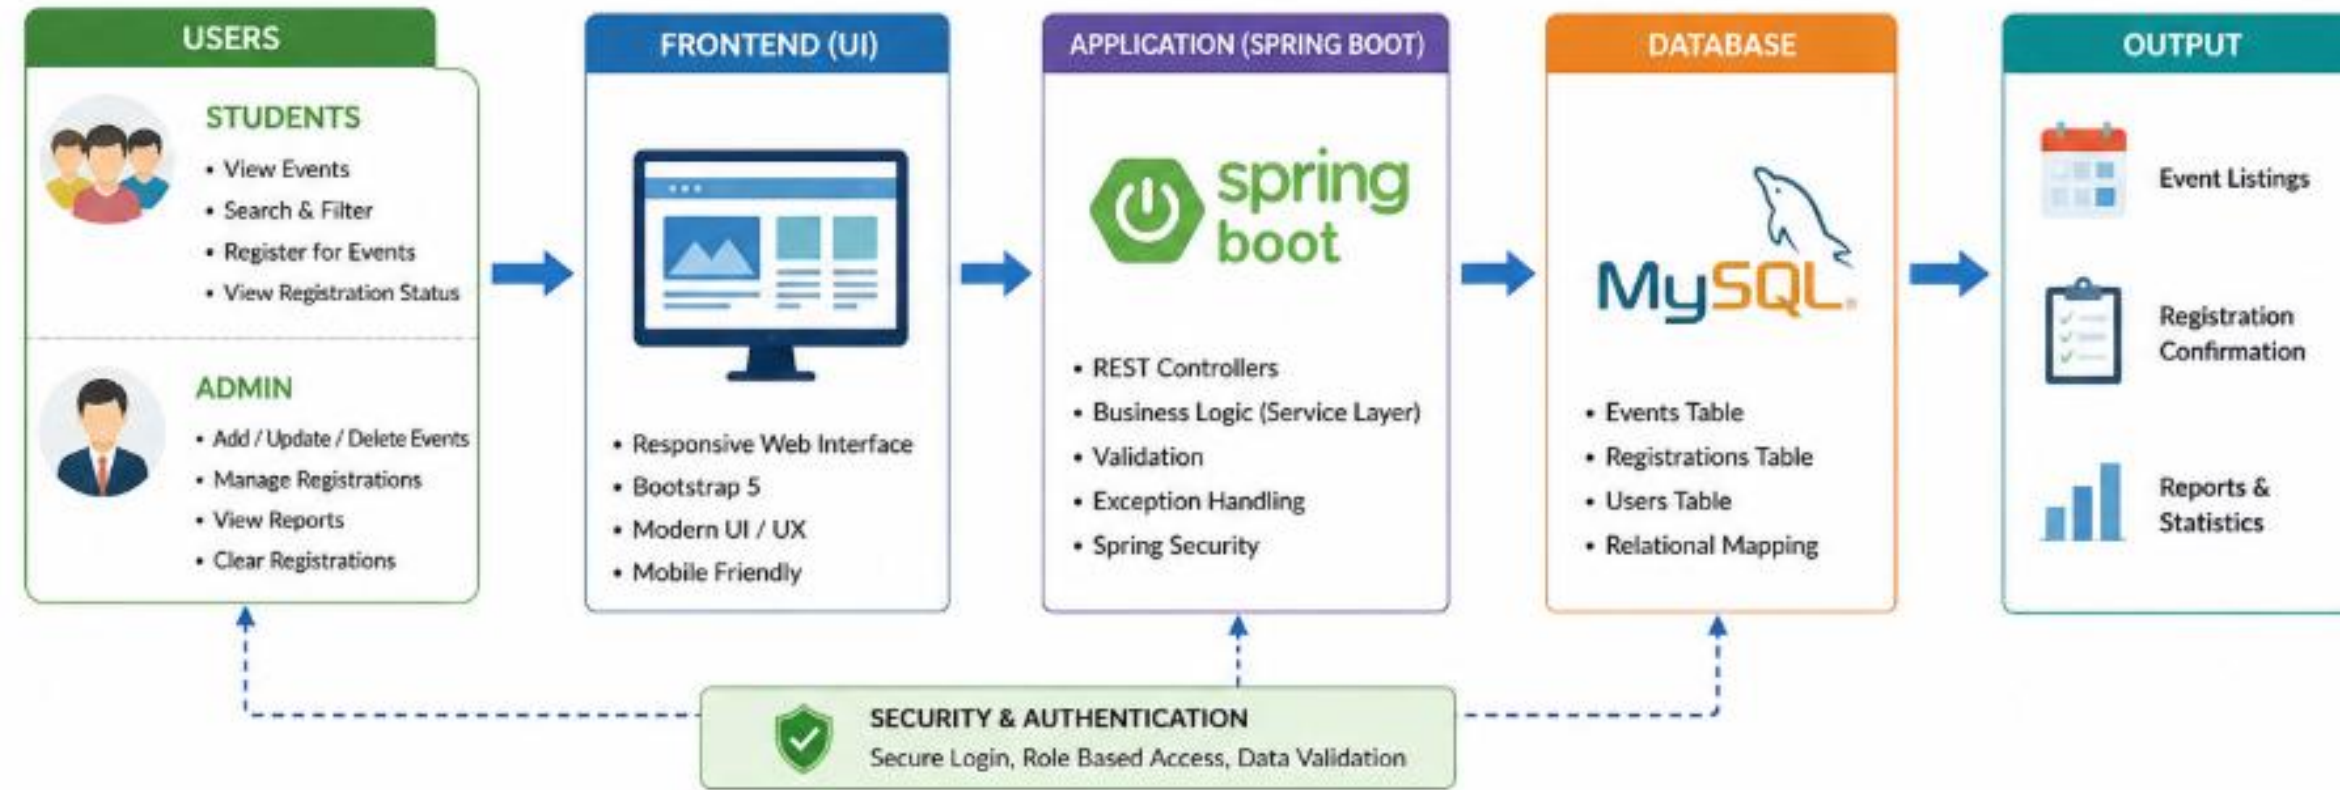

7

8

9

- Provides an online platform for event management
- Enables admin to add, update, and delete events
- Stores data securely in a database
- Reduces manual work and errors
- Improves communication between students and admin
- Tracks registrations and available seats
- Ensures better organization and efficiency

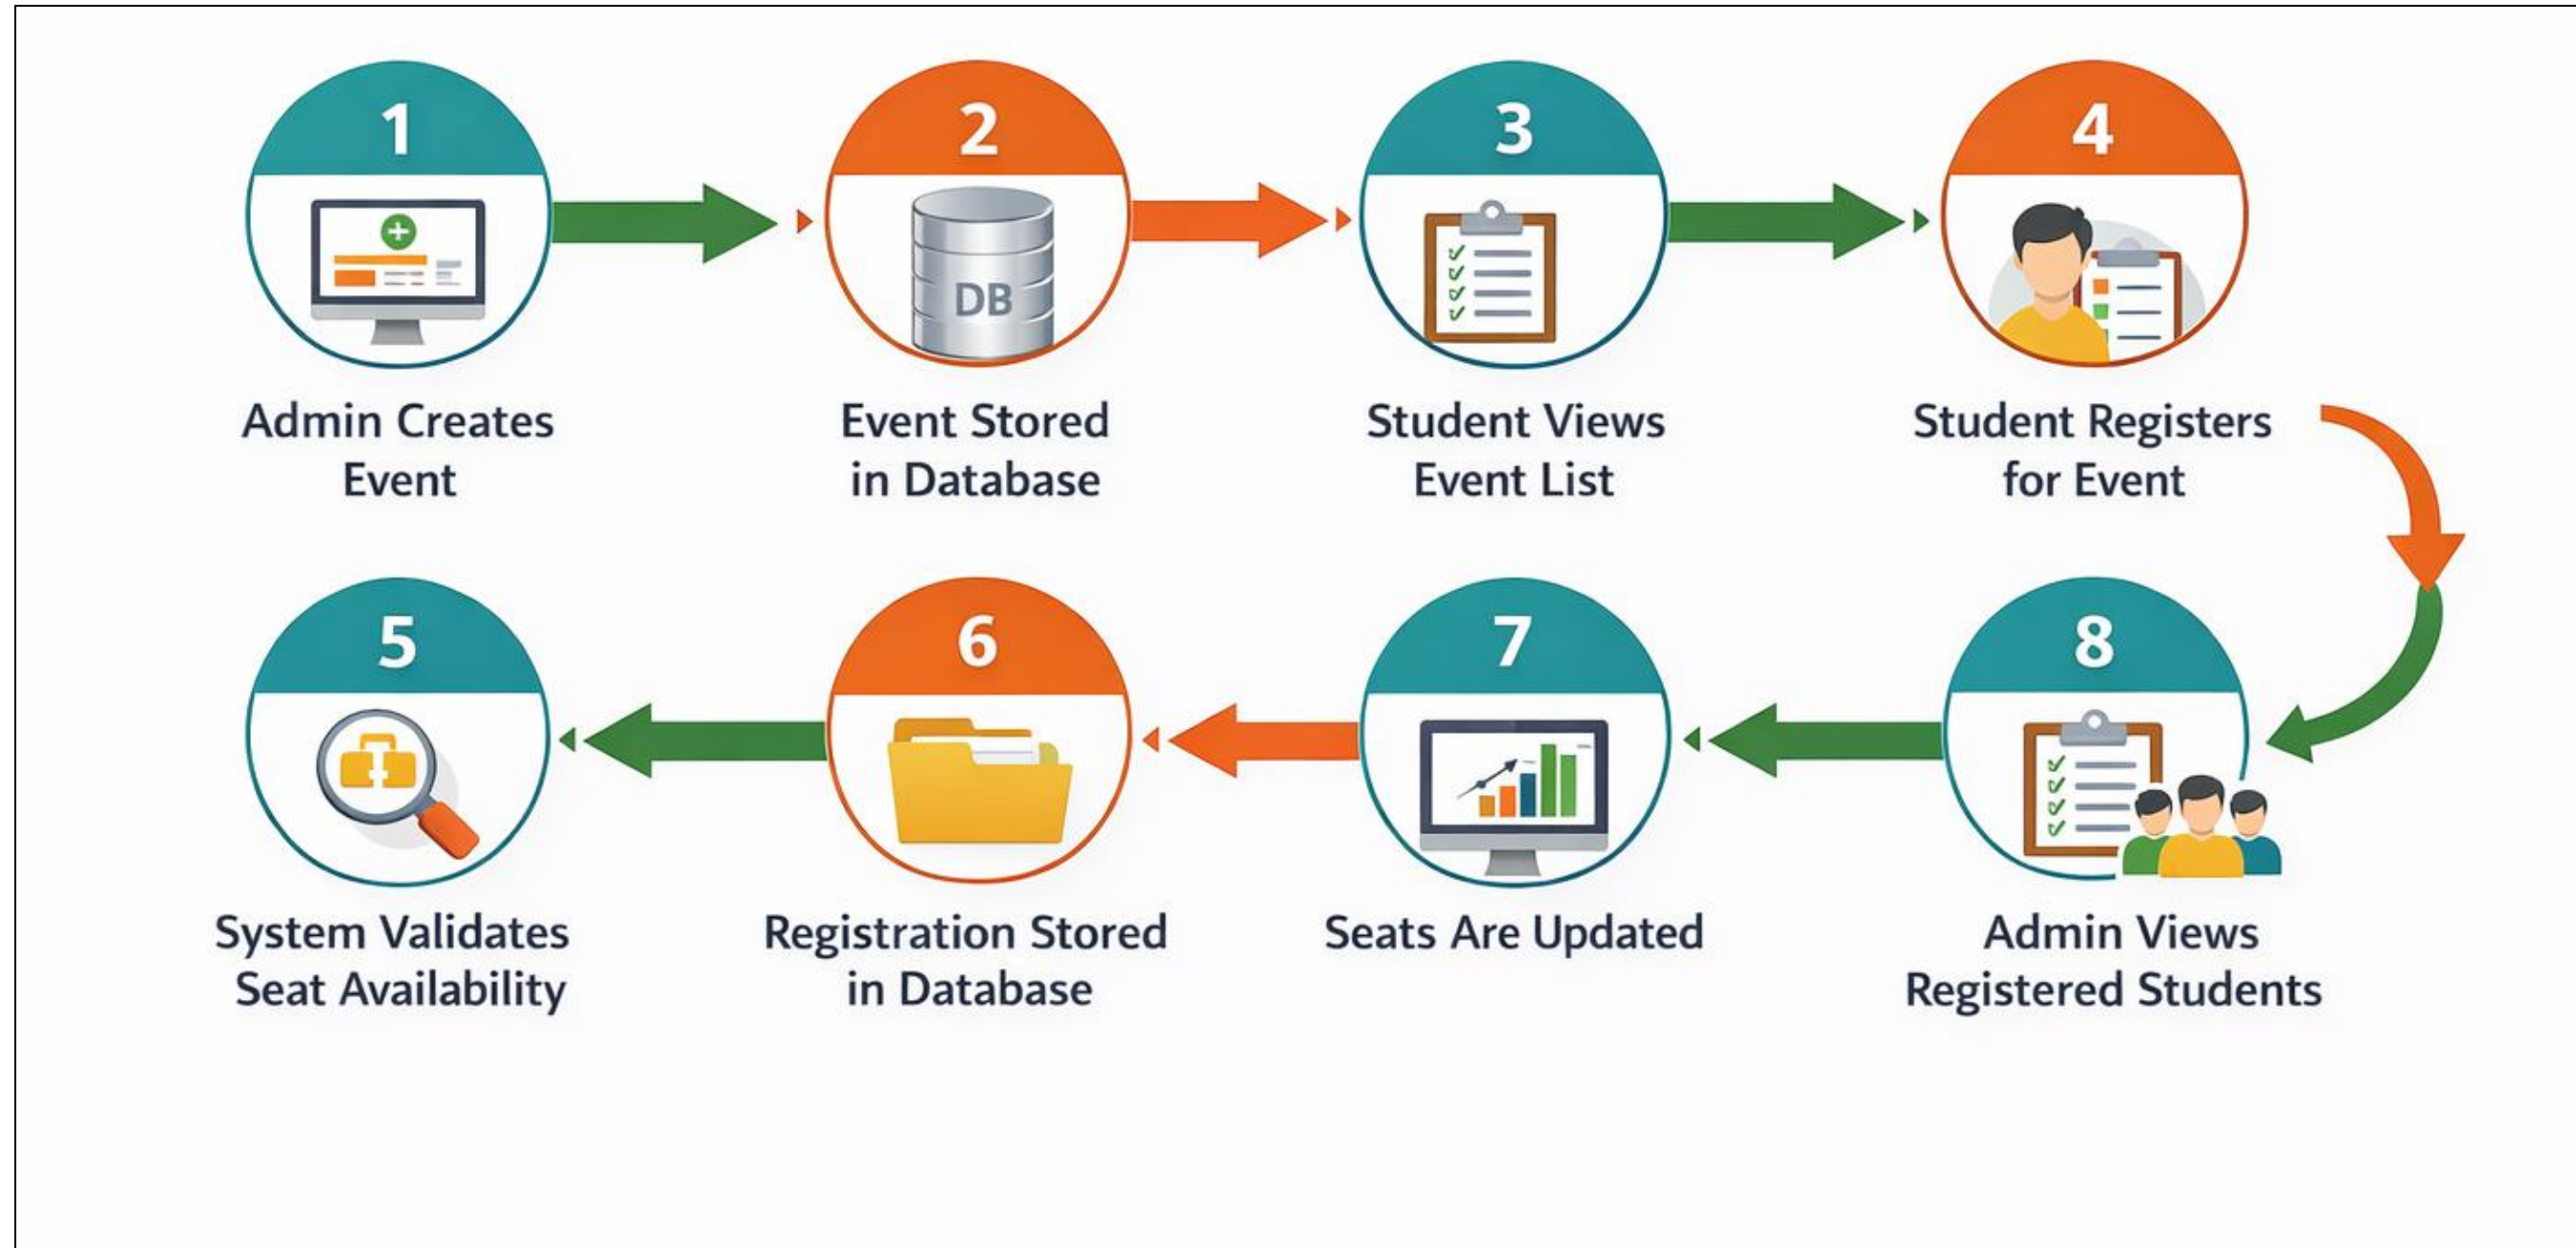

PROPOSED SYSTEM ARCHITECTURE

Explanation:

- **Input:** Student details, event details
- **Processing:** Validation, registration, seat management
- **Database:** MySQL stores events and registrations
- **Output:** Event list, registration confirmation, admin reports

WORKFLOW

1

2

3

4

5

6

7

8

9

TECHNOLOGIES USED

Frontend: HTML, CSS, Thymeleaf

Backend: Spring Boot (Java)

Database: MySQL

Tools: VS Code, Maven

Hardware Requirements: Minimum 4GB RAM, i3 Processor

Software Requirements: JDK 8+, MySQL Server, Web Browser

IMPLEMENTATION SCREENSHOTS

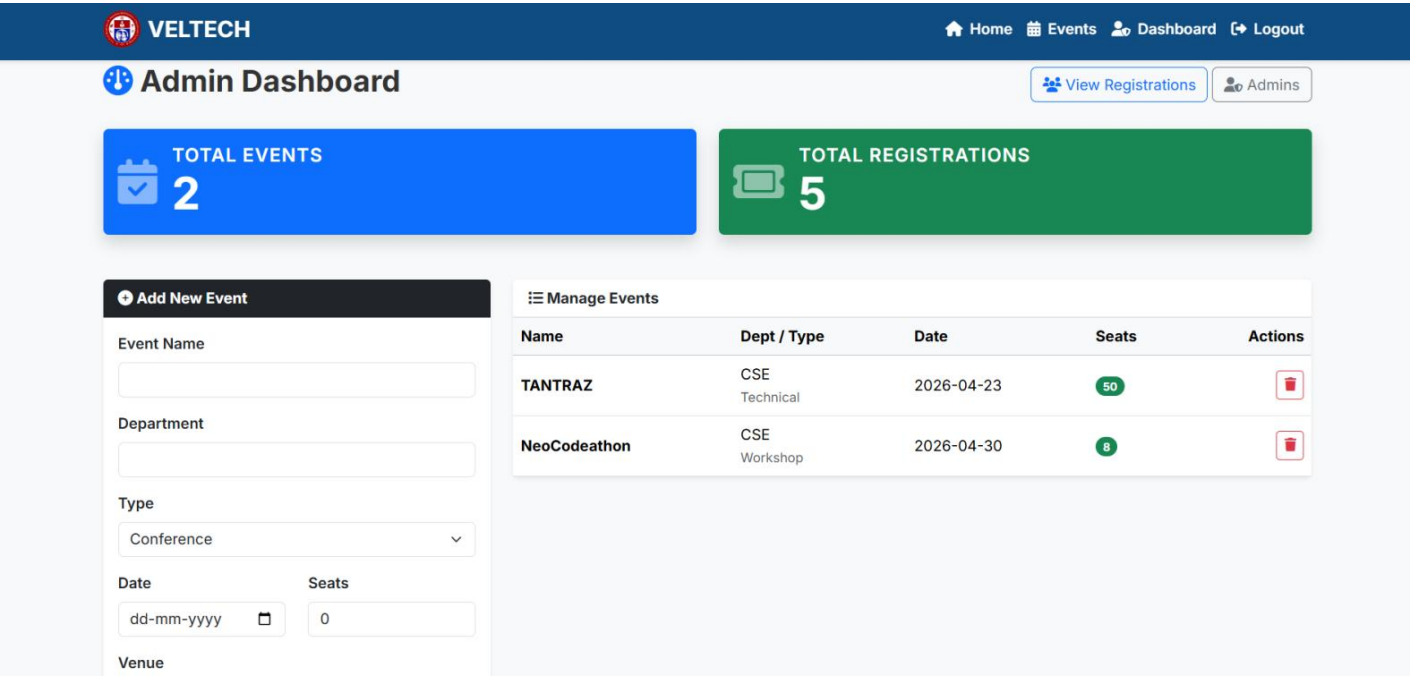

Home Page:

- Displays list of events available for students.

Admin Page:

- Allows admin to add and manage events.

8(A)

IMPLEMENTATION SCREENSHOTS

Registration Page:

- Students fill details to register for events.

The screenshot shows the Veltech Tantraz registration interface. At the top is a dark blue header with the Veltech logo and navigation links: Home, Events, Dashboard, and Logout. Below the header, the event details are displayed: 'TANTRAZ' in blue, the date '2026-04-23', the location 'Convocation Hall', and a green button indicating '50 Seats Available'. The main section is titled 'Student Registration' in a blue bar. It contains a registration form with the following fields: 'Full Name' (text input with placeholder 'Enter your full name'), 'Email Address' (text input with placeholder 'student@college.edu'), 'Department' (dropdown menu with 'Select Department' and a downward arrow), and 'Number of Tickets' (text input with '0'). Below the 'Number of Tickets' field, a note states 'Maximum 5 tickets per registration.' At the bottom of the form is a dark blue button with a checkmark icon and the text 'Confirm Registration'.

ADVANTAGES & LIMITATIONS

1

Advantages:

- Reduces manual work
- Improves accuracy
- Easy to use interface
- Centralized system
- Saves time

2

3

4

5

Limitations:

- Requires internet connection
- Basic security (can be improved)
- Limited to campus-level usage

6

7

8

9

Thank you
